

Stephen Wanyee

Full-Stack Software Engineer

Nairobi, Kenya | kamauwanyee@gmail.com | +254 725 127 193 | linkedin.com/in/swanyee

Summary

Full-Stack Software Engineer with 6+ years building production SaaS across mobile, web, backend, and AI-enabled workflows. At Patrium Health, own frontend delivery across React Native, Vue, browser extension, and TypeScript services while building Python NLP / LLM pipelines. Recent work reduced mobile cold start from 32–45 seconds to under 15 seconds. Strongest at end-to-end delivery under unreliable connectivity, data privacy, observability, and EHR integration constraints.

Skills

Languages: TypeScript, JavaScript, Python, SQL, PHP

Frontend and Mobile: React Native, Expo, React, Vue 3, Vue Router, Pinia, React Query, component libraries, SCSS, IndexedDB, Chrome extensions

Backend and Data: Node.js, NestJS, GraphQL, REST APIs, Django, Laravel, PostgreSQL, Redis, background jobs

Cloud and Engineering: AWS S3, Firebase, Git, GitHub, GitLab, CI/CD, automated testing, structured logging, trace context, observability, offline-first systems, multi-tenant SaaS

Experience

Software Engineer

Oct 2023 - Present

Patrium Health | Nairobi, Kenya

- Own frontend delivery across React Native, the browser extension, and the Vue dashboard, including a shared component factory and library, code reviews, onboarding, and cross-surface architecture decisions.
- Design React Query and MMKV-backed persistence and offline queues with tiered caching, checkpoints, retry classification, health recovery, and failed-task requeue without data loss.
- Ship AI-assisted documentation and correction workflows across mobile, extension, dashboard, and services, turning recordings and documents into reviewable clinical data.
- Own TypeScript/NestJS GraphQL services and Python NLP/LLM pipelines that transform recordings and referral documents into structured clinical data with staged processing, retries, and human review.
- Strengthen EHR integrations by preventing duplicate records, preserving local work until submission succeeds, and recovering failed submissions with actionable sync progress and failure states.

Product Developer

Sep 2022 - Oct 2023

Kinetic Education | Nairobi, Kenya

- Led a 3-person engineering team building education products with Django and React while balancing delivery, mentoring, and product priorities.
- Established a 2-week release cadence through workflow automation and clearer engineering processes, improving release predictability and stability.
- Shipped 3 product modules within a 2-month launch window.
- Used product analytics and session recordings to identify user friction and guide roadmap decisions.
- Built and tested Django and React web features for Safari and Chrome compatibility, fixing a cross-domain session issue and improving validation and guidance from session evidence.

Software Engineer

Jun 2021 - Sep 2022

Identigate Integrated Solutions | Nairobi, Kenya

- Built SaaS applications end-to-end with Laravel, Vue, Inertia.js, and Tailwind CSS, delivering user-facing workflows and backend integrations.
- Improved team delivery with automated testing, technical documentation, repeatable CI/CD workflows, and onboarding guides.

Software Developer and Consultant

Jan 2020 - Jul 2020

Slash Dot Labs Limited | Nairobi, Kenya

- Delivered client applications and iPay payment integrations from requirements analysis through deployment, including backend business logic, data integrations, and a payment-enabled WordPress plugin.

Education

Bachelor of Science in Informatics and Computer Science

Strathmore University | Nairobi, Kenya

Exemplary Academic Performance Award
